

BioFibreLoop Newsletter

The DITF enthusiastically coordinates this exciting Horizon Europe project, in which partners from 9 countries are researching new, bio-based textile materials and processes and bringing them to market maturity. We, the BioFibreLoop project consortium, are thus taking a further step towards a sustainable circular economy. Our newsletter will update you on our project activities and results, upcoming events as well as important facts on circular economy.

We hope you enjoy getting to know BioFibreLoop and wish you a pleasant inspiring read!

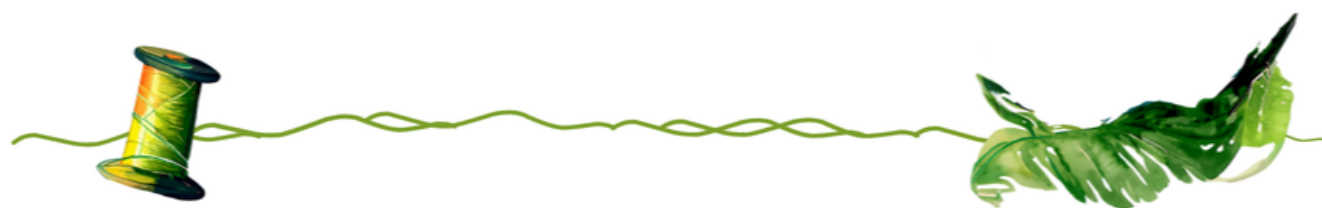

On behalf of the BioFibreLoop consortium

About

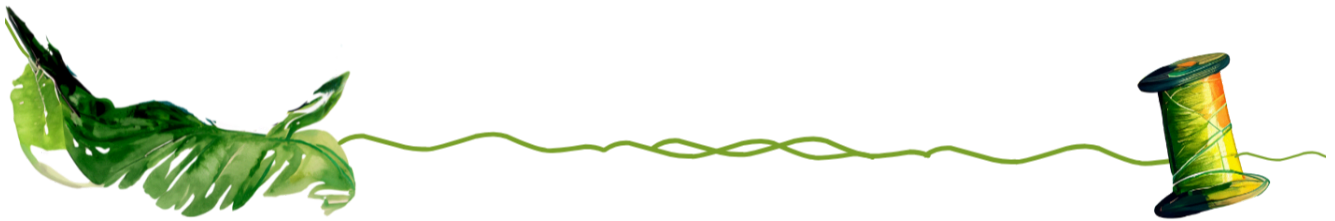

The BioFibreLoop project will make the EU textile industry more sustainable with a focus on outdoor-, active- and workwear. Recyclable textiles with bio-inspired functionalisation will be produced from bio-based materials.

Partnership

The BioFibreLoop consortium is composed of strong and innovative industrial partners in the active-, outdoor- and workwear industries, covering the whole textile value chain. They are complemented by world-class academic partners bringing excellent expertise on the development of textile processes and technologies, safety, and sustainability as well as circularity and recycling aspects. In addition, the consortium includes actors of the social sciences providing outstanding knowledge on stakeholder engagement and innovation management

Project News

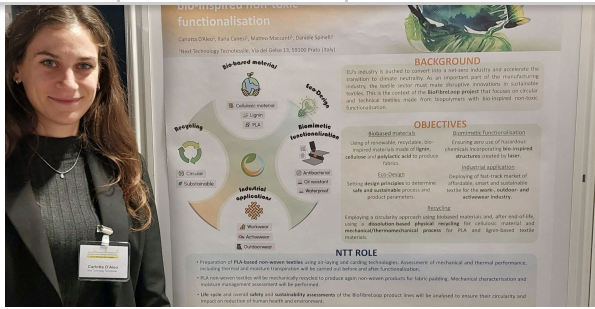

Second press release

Read more about BioFibreLoop's first results: First coatings and textile patterns made from renewable and recyclable materials.

Online Lecture

Thomas Stegmaier from DITF gave an inspiring lecture today on “Biomimetics as a Source of Ideas for an Environmentally Friendly Future in the Textile Industry”.

ADD International Textile Conference

Carlotta D'Aleo from NTT presented a BioFibreLoop poster on the Aachen-Denkendorf-Dresden International Textile Conference 2024 on 21-22 November 2024.

ISAB 2024

In September 2024, BioFibreLoop “travelled” with Thomas Stegmaier from our partner DITF to China, to The International Symposium on Advanced Bionics (ISAB 2024).

Project start

We are happy to announce the start of BioFibreLoop, an innovation action project funded by the European Union.
