5. September 2025

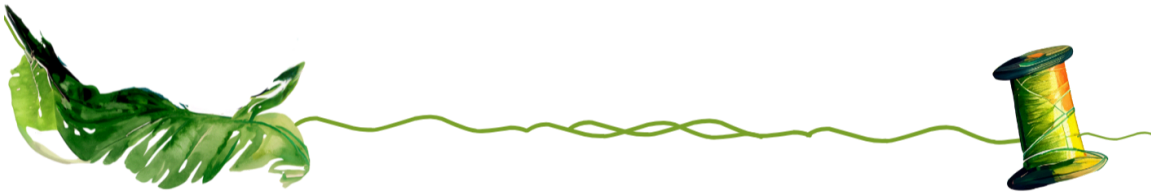

Welcome to the second edition of our BioFibreLoop Newsletter!

And it is the first one on LinkedIn! We have moved our newsletter from email to LinkedIn to make it more accessible and engaging for our community. On LinkedIn, you can easily follow updates, interact with our content, and join the conversation in real time. This shift allows us to connect with you more directly and build a stronger, more dynamic exchange.

This newsletter will keep you updated on our progress, share news, and provide you with upcoming events we're taking part in.

We wish you a pleasant read,

the BioFibreLoop team

Consortium meeting in June 2025

Our consortium meeting took place in June in Finland, hosted by our partner VTT. It was filled with intense discussions and interactive workshops, driving our project forward. Yet again, the personal exchange with partners proved crucial. We had the opportunity to see, touch and smell our innovative bio-based materials. Besides the technical exchange, we also strengthened our team spirit by literally jumping into cold water together from our sauna boat. We experienced Finnish culture during a guided city tour and great dinners.

Communication activities

Blog articles

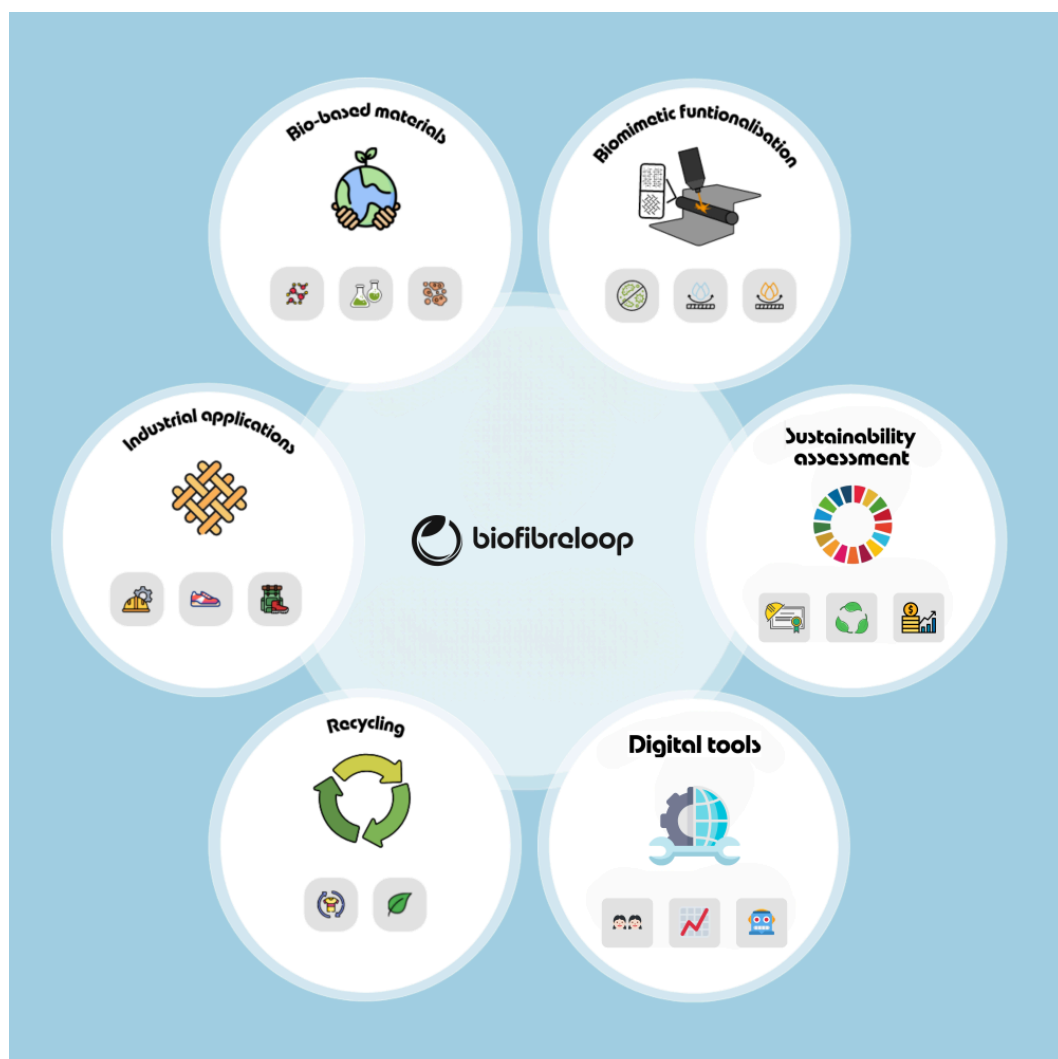

Find more out about the topics [laser-based surface functionalisation](#) and [digitalisation tools](#) in our respective blog articles. Those interviews with our respective experts will not only give you insights in the topics, but you'll also learn more about their personal motivation.

Press releases

Read our [press release](#) about the challenge to build up a lignin supply chain!

Articles and publications

BioFibreLoop published [an article](#) about the project's first results on the **Innovation News Network** (INN). It explains how each puzzle piece from bio-based materials to industrial application form a greater whole.

BioFibreLoop concept combines expertises along the entire value chain.

Upcoming Events

GFC Dornbirn

The [Dornbirn- Global Fiber Congress](#) will take place on 10th - 12th September 2025 in Dornbirn (Austria). It serves as Dornbirn GFC serves as an international innovation platform in the fibre, textile, nonwovens, and machinery sectors.

Meet our partner FreyZein at their booth and take the opportunity to listen to their talk. You can also meet our partner DITF (Deutsche Institute für Textil- und Faserforschung Denkendorf) there.

ECOSYSTEM conference

The [ECOSYSTEM conference](#) will take place on 29th September - 01st October 2025 in Gothenburg (Sweden). Its all about textile circularity, specifically, the exploration and advancement of new technologies and business models that promote circularity and sustainability within the textile sector.

Meet us there and join our [co-creation workshop](#) "'Coat Me If You Can | Uncovering lignin's potential in textiles industry"!

ECOMONDO

The [ECOMONDO conference](#) is an international trade fair and conference dedicated to the **green and circular economy**, particularly within the European and Mediterranean context. It will take place on 4th - 7th November 2025 in Rimini.

Meet our partner NTT (Next Technology Tecnotessile) at their booth. Listen also to their presentation highlighting BioFibreLoop! Stay tuned for our article which is also written in frame of the presentation!

Contribution NTT

E-Textiles 2025

The [E-Textiles 2025](#), the 7th International Conference on the Challenges, Opportunities, Innovations and Applications in Electronic Textiles will take place from the 12th-14th November in Roubaix, France.

Meet our partner imec at their booth!
